

SAFe® Scrum Master

Why SAFe® Scrum Master ?

Agile is a mindset, a way of working; Scrum is a framework based on Agile values and principles, while SAFe® is a scaling framework that implements Scrum at an enterprise level.

Why SAFe?

It's the Framework of Choice for Leading Organizations
More than 1,000,000 practitioners and 20,000 enterprises worldwide in nearly every industry trust the Scaled Agile Framework® (SAFe®). Gartner names SAFe the #1 most considered and adopted framework for scaling Agile.

SAFe has shown double-digit improvements in time-to-market, productivity, quality, and employee engagement.

Gartner has found SAFe to be the #1 most considered and adopted framework for scaling agile.

How the Scaled Agile Framework® Benefits Organizations

- Faster Time-to-market
- Improvements in Quality
- Increase in Productivity
- Better Employee Engagement

SAFe® Scrum Master Course Outline

Attendees learn:

- How to facilitate Scrum events.
- How to support PI execution.
- How to coach teams to constantly improve.
- How to implement DevOps for continuous flow and delivery.

After taking the course, you'll know how to:

- Empower and lead an Agile team
- Facilitate Agile events like iteration planning, standups, and retrospectives
- Help teams plan and complete their work
- You'll also learn the principles of servant leadership, which are crucial for key SAFe team roles.
- These skills will enable you to develop high-performing, engaged, and continuously improving teams in your own organization.

SAFe® Scrum Master answers the questions:

- How do Scrum Masters facilitate planning and execution of work during a PI?
- How do you coach and lead Agile teams inside a SAFe enterprise?
- How do you become a servant leader to build a high-performing team?

Overview:

What Is SAFe®?

The world's most trusted system for business agility
Your customers expect instant gratification, from same-day package delivery to daily software updates for their self-parking car. And they don't have the patience to wait for your company to figure that out. Now is the time for your organization to adopt a smarter way of working. SAFe® is your system to manage digital disruption.

Applying the Scrum Master Role within a SAFe Enterprise
The SAFe® Scrum Master course equips attendees to coach Agile teams to deliver business value at scale. The course teaches you the tactical skills needed to be an effective Scrum Master in a SAFe organization. It also gives you the guidance and tools necessary for working in remote environments with distributed teams.

Learn the effective skills to become a SAFe® Scrum Master by attending 16 hours of training delivered by SAFe® Program consultants.

The SAFe® 5.1 Scrum Master (SSM) course helps you to understand and implement Lean-Agile principles and practices, Program increment, and to facilitate Agile events like iteration planning, standups, and retrospectives.

This course directly helps Scrum Masters to lead Agile teams successfully with strategic implementation of Agile methodologies in their organizations.

In the SAFe® Scrum Master training, you will also learn the principles of servant leadership to help and improve high-performing, engaged, continuously improving teams in organizations.

By the end of SSM certification training, the professionals will be able to lead companies successfully that follow the SAFe® framework.
