

Red Hat OpenStack Administration I Core Operations for Domain Operators

Why Learn OpenStack Administration?

Red Hat OpenStack Administration I: Core Operations for Domain Operators (CL110) teaches you how to operate and manage a production Red Hat OpenStack Platform (RHOSP) single-site overcloud.

Audience Profile :

- This course is designed for cloud users who deploy application instances and stacks, domain operators who manage resources and security for cloud users, and any other cloud personnel interested in, or responsible for, maintaining applications on private or hybrid OpenStack clouds. Any cloud persona, or personnel with roles that include performing technology evaluation, should attend this course to learn RHOSP operation and application deployment methods.

Prerequisites:

- Become a Red Hat Certified System Administrator (RHCSA) or demonstrate equivalent experience.
- If you are not a RHCSA, you can take a skill assessment to gauge your level of knowledge.

Course Overview:

- You will learn how to create secure project environments in which to provision resources and manage security privileges that cloud users need to deploy scalable cloud applications.
- You will learn about OpenShift integration with load balancers, identity management, monitoring, proxies, and storage. You will also develop more troubleshooting

Red Hat OpenStack Administration I Core Operations for Domain Operators Outline:

- Introduction to Red Hat OpenStack Platform
- Describe OpenStack personas, launch an instance, and describe the OpenStack components and architecture.
- Manage application projects in a multitenant cloud
- Create and configure projects with secure user access and sufficient resources to support cloud user application deployment requirements.
- Manage OpenStack networking
- Describe how IP networks are implemented in OpenStack, including fundamental TCP/IP stack behavior, software-defined networking elements, and the common types of networks available to self-service cloud users.
- Configure resources to launch a non-public instance
- Configure the requisite resource types for launching a basic non-public instance, including vCPUs, memory, and a system disk image, and launch an instance of an application component that runs in a tenant network with no public access.
- Configure virtual machine system disks
- Identify the available choices for configuring, storing and selecting block-based virtual machine (VM) system disks, including the choice of ephemeral or persistent disks for specific use cases.
- Provide additional storage strategies
- Identify the available choices for additional cloud storage techniques, including object-based storage, network file sharing, and volumes sourced from a file sharing service.
- Configure resources to launch an instance with public access
- Identify and configure the additional resource types required to launch instances with public access for specific use cases, including networking and access security elements.
- Automate customized cloud application launches
- Configure and deploy a typical multi-tier cloud application stack, defined as an architected template of scalable VM instances, including per-instance launch customizations.
- Manage cloud application placement
- Introduce overcloud layouts more complex than a single site, and explain the management resources to control the placement of launched instances, including segregation elements such as cells and availability zones, and placement attributes such as requisite compute node resources.

Training Solutions:

✓ Offline Classroom Instructor-Led Training in our labs or onsite Locations.

✓ Virtual Instructor-Led Training Via Virtual Video Conferencing Tools.

Why Learners Prefer CLS as their Training Services provider ?

- Premium Training Services Accredited from Global Technology Vendors.
- Best Rated Experts & Certified Trainers in Egypt.
- Official Training Hours, Practice Labs, Hands-on Learning.
- CLS Training Classrooms are designed with High Edge PCs and Training Facilities.
- Return on Training Investment is Guaranteed to boost performance.
